

is a next generation Ammonium Sulphate. Bioactive Ammonium Sulphate is an activated ammonium Sulphate with patent technology of Niha Corp USA. It is coated with activating agents, a blend of Acclimatized Beneficial Microbes consortium, Microbes Growth promoting Organic material blend. This Bioactivation ensures more nutrient availability to plant and less Nitrogen losses atmosphere. Giving significant higher yield vs classical Ammonium Sulphate.

Sulphur is part of every living cell and is important to the formation of proteins. Sulphur has synergetic relation with Nitrogen.

It contains Nitrogen in Ammoniacal form and Sulphur in sulphate form, both are quick in action and give prompt response. It is highly water soluble and have acidic effect on medium.

It is an ideal Nitrogen and Sulfur supplementing fertilizer for vegetables, fruits and oil seed crops for top dressing/fertigation.
